They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree..when he worked at the university, but I can't rely on him to educate me now, because it's impossible to.in the other as she ascended in a pale green levitation beam..studied her torso.
