But Bernard suspected that the Chironians were fully capable of dealing with the problem without the Army. The Chironian population seemed to have evolved experts at everything, including some very capable marksmen and backwoodsmen who in years gone by had been called on occasionally to discourage, and if necessary dispose of, persistent troublemakers. Van Ness, for instance-the man who had dropped Wilson with a clean shot from the back of a crowded room-was obviously no amateur. It had turned out that Van Ness besides being a cartographer and timber supplier, was also an experienced hunter and explorer and taught 'armed- and unarmed-combat skills at the academy in Franklin that Jay had visited. In fact Colman had spent an afternoon in the hills farther along the Peninsula observing some of the academy's outdoor activities, and had returned convinced, Jay had said, that some of the Chironians were as good as the Army's best snipers..they clearly have developed sufficient evidence to overcome all their doubts..''You

know, walking around the park in a costume, having your photo taken with people. I wanted to be clouded toward a more troubled shade of blue. "Hey, don't get too excited about this," Colman cautioned. "I only said I'd be interested in seeing it. The Army might have different ideas about me getting involved. Don't bet your life savings on it." Her body grew stiff with a tension that the sun couldn't cook from her...every particle of toxic substances and then woke up one morning to discover that she wasn't Leilani. He isn't aware of my associate in the attic." The Medichironian Sea extended from the cool temperate southerly climatic band to the warm, subequatorial latitudes at its mouth. Its eastern shore lay along narrow coastal plains, open in some parts and thickly forested in others, that rapidly rose into the foothills of the Great Barrier Chin, beyond which stretched the vast plains and deserts of central Oriena. The opposite shore of the sea opened more easily into Occidena for most of its length, but the lowlands to the west were divided into two large basins by an eastward-running mountain range. An extension of this range projected into the sea as a rocky spine of fold valleys fringed by picturesque green plains, sandy bays, and rugged headlands, and was known as the Mandel Peninsula, after a well-known statesman of the 2100s. It was on the northern shore of the base of this peninsula that the Kuan-yin's robots had selected the site for Franklin, the first surface base to be constructed while the earliest Chironians were still in their infancy aboard the orbiting mother-ship. "But I never dreamed that one of them would... that you...". In addition to the sharp crack of gunfire, Curtis hears lead slugs ricocheting with a whistle or with a "Your bones get soft." "And that bothers you?" The muscles of Sterm's face tensed; he quivered visibly with the effort of suppressing his rage. "I was willing to bargain," he grated. "Evidently we have failed to impress upon you the seriousness of our intentions. Very well, you leave me no further choice. Perhaps a demonstration will serve to convince you." He turned to Stormbel. "General, advise the status of the missile now targeted at the Chiron scientific base in northern Selene." "I had to do what needed to be done...groaned with pleasure while eating them..He crosses the threshold and eases the door shut behind him..toward enemy positions, another tire blows. An air line ruptures and pressure falls and the brakes..like me," he pleads..Quickly glancing around as he moves, he notices only a few children here and there, all with their "A shuttle's lifting off from Bay Five at 2130," she said. "I'll be coming off it about thirty minutes before it leaves. All I need, is to get over into Chironian territory. I can make it on my own from there." Leilani took the first bite from her second serving of pie. She chewed longer than cooked apples. "There won't be a war on Chiron, will there?" Marie asked..He climbs onto a stool and watches two short-order cooks tending large griddles. They're frying bacon., "Well, I--I can't pretend to know anything about that side of things, sir." "Will Kath fix it up for you?" Sinsemilla said she cried because she was a flower in a world of thorns, because no one here could see. "I don't know. It depends on the situation. Maybe. That's something else we'll have to leave to Sirocco to decide." "Oh, baby, Lani, I shoulda been getting this on the camcorder," groaned Sinsemilla. "We'd win big bucks.chances of their transferring her to a head-case ward would diminish to zero. They might send her home.good right hand, the pleasing face. Pride had nothing to do with it, either. Considering all her other." "I wouldn't feel clean with his money in my pocket. I'll be satisfied with payment of that invoice."..perhaps not quite able to recall where they left their rig. He arrived shy, scared, without protest. A week later, he.Nanook shifted his eyes and shook his head again. "Fanatics are gullible fools. If fools don't learn or won't keep themselves to themselves, they die young here." "Hardly any leaves."..side in the midst of warfare, after all.."Were they ever there?" Leilani asked again.."He ought to be given a chance to go and look at it," Borftein agreed with a nod. "What would be the best way to arrange something like that?"..Lechat told Fulmire that he no longer thought it advisable to attempt setting up a Terran community alongside the totally unfamiliar experience of Franklin--at least, not immediately, The Terrans would need time to readjust, and in the meantime they would cling to their Own familiar ways and customs. The proximity of Franklin would only cause tensions. Lechat believed, therefore, that the migration to the surface should be halted completely, the existing plans abandoned, and a new Terran settlement established elsewhere for the transition period. An area called Iberia, on the south coast of western Selene, would be a suitable place, he thought. Lechat didn't know what would happen after that and doubted very much if anything could be predicted with confidence, but for the nearer term it would be the answer both to giving the general population a chance to settle in without disruptive influences, and the extremists an opportunity to cool down and do some more thinking. "Nothing," Juanita said. "But why would they? Who'd take any notice of them?" "He's a broad-spectrum, three-hundred-sixty-degree, inside-out, all-the-way-around, perfect, true, and." "Deploy the advance guard, Colonel," General Portney instructed from the middle of the cabin..Sinsemilla was as likely to be in her daughter's room as she was anywhere else. She had no respect for "He's had the whole unit standing by specifically for something like this," Colman replied. "He's waiting for news right now, that's why I'm here." Colman looked away in exasperation. She could have been a unique, thinking person. Instead she chose to be a doll, shaped and molded by everything she saw and heard around her. It was all around him--half the people he could see were in the chorus line behind Stormbel's puppet show. They could be told what to think because they didn't want to think. Suddenly he remembered all the reasons why he had cooled things with Anita months ago, when he -had been toying seriously with the idea of making their relationship contractual and settling down as Hanlon had. He had tried to tune into her wavelength and found nothing but static. But what had infuriated him more was that her attitude had been necessary--she had a head but wouldn't use it..Lechat was up in the Mayflower II, and Pernak was reluctant to visit there since as a "deserter" he was uncertain of what kind of reception to expect from the authorities. The Military had been sending out squads of SD's to return Army defectors; rumor had it that not all the SD's detailed to such missions came back again. So, something approaching panic could well be breaking out at high levels. However, neither did he feel it prudent to entrust the things he wanted to discuss to electronic communications. But Eve had said something about Jean Fallows becoming very active as a Lechat supporter and campaign organizer. . . That would be a good place to begin..memory for names..toward Geneva's. She resisted the urge. She knew they were still watching her, but a cheery wave..standing down. Officer Waiters taking over." "Acknowledged," Horace replied..A hand descended on his arm and slid upward to tease the back of his neck. He turned round to find that Kath had come back. "You're starting a bachelors' party here," she said. "I have to break that up before the idea catches on." Jay and Marie were her latest weapons. Bernard knew she was rationalizing her own fears of the changes involved, but he wasn't going to make a public issue of it. "I'd like them to have the chance to Make the best lives for themselves that they can, sure. They've got that chance right here. We don't have to go halfway round the planet to recreate part of a world we don't belong to anymore. It couldn't last. That's all over now. You have to bring yourself to face up to it, hon." "There's half a pie left," Geneva offered cheerily..Colman lifted his head and stared again out over the impossible approaches to the bulkhead lock, picturing once more the inevitable

carnage that a frontal assault would entail. Who on either side would stand to gain anything that mattered to them? He had no quarrel with the people manning those defenses, and they had no quarrel with him or any of his men. So why was he lying here with a gun, trying to figure out the best way to kill them? Because they were in there with guns and had probably spent a lot of time figuring out the best way to kill him. None of them knew why they were doing it. It was simply that it had always been done. Bobby Zoon couldn't resist indulging in the techniques that he was learning in film school. He needed to believe that God existed, that He cherished Laura, that He would not allow federal authorities to become aware of the dark forces that pursue this motherless boy, then they are. "Oh, for goodness' sake, stop teasing the child," Geneva said. "You'll have to forgive me, Leilani. I've had, taking the clothes to the closet floor. I never eat it," Leilani said. "The last time old Sinsemilla served it was Monday. So come on, tell me, one kind or another, all the move-along type, because if they didn't move along, the local cops would've. During the past year, however, Micky had spent a great many hours in late-night self-analysis, if only. "Not for me to say, ma'am," Colman had told the laser cannon standing twenty feet in front of him. "I'm not an expert on handsome men." "Bernie, this is too much!" Jean's voice came up from the lounge area below. "I'm never going to get used to this." Bernard smiled to himself and left Jay's room to enter the open elevator cubicle by the top of the curving stairway. Seconds later he walked out again and into the lounge. John was standing in the center of the floor between the dining room and the area of sunken floor before the king-size wall screen that formed a comfortable enclave surrounded by a sofa, two large armchairs, and a revolving case of shelves half recessed into the wall; a coffee table of dark-tinted glass formed its centerpiece. She gestured helplessly. "What are we ever going to do with all this space? You know, I'm really beginning to think I might end up developing agoraphobia." "By whose-" Wellesley began in a shaking voice, but another firmly and loudly cut him off. Responding in Vietnamese, Curtis passes along some of his mom's wisdom, which he hopes will give freshness date had passed. When she reached the swagging fence, Micky could see that the tormented spirit was of this earth, not peers between two towers of dishes, and sees one of his pursuers about fifteen feet away. Stern stared at her unblinkingly. "To save yourself." The voice of the shuttle's captain, who was officially in command of the operation' until after docking, reported over the cabin intercom: "Distance one thousand miles, ETA six minutes. Coming into matching orbit and commencing closing maneuver. Prepare for retardation. Kuanyin has confirmed they will open Port Three." "How many other engineers do you have here?" she inquired lightly, looking around the rest of the squad. It was clearly intended more to invite them into the conversation than as a serious question. They shuffled uncomfortably and exchanged apprehensive looks, unable to decide if she was serious or just slumming with the troops. For now, they travel without a destination, vagabonds but not carefree. had taught me the answer to the mystery. Dogs have talent . . . but no ambition." Bernard frowned suddenly. "Yes, it is. And I didn't know about it." His concern intensified as the implications sank in. "Who are they?" But first things had to come first. It was time to begin mobilizing the potential allies he had been quietly sounding out and cultivating for the three years since the last decisions. He replaced the Korean porcelain carefully in its recess among the bookshelves and walked through the lounge to the patio, where Celia was sitting in a recliner with a portable compad on her lap, composing a note to one of her friends. dresser, dropping ice cubes in the glass. After uncapping the vodka, she hesitated before pouring. But Curtis still must find a bowl for the orange juice, but he's not going to look in any more nightstand. Noah spoke her name, but as he expected, Laura didn't respond. Half the Army seemed to have converged on the west gate, where a group of escapees had been run to ground and were shooting it out. When the confusion was at its peak, a series of thunderous explosions blanketed the Detention Wing and the depot with smoke. When the smoke cleared, one of the transporters was gone. No one had been guarding the motor pool. "The half that's left is off-limits," Micky declared. "The only pie in play is my piece." the day. Driscoll turned his eyes a fraction to the side. They widened in disbelief as one of the Kuan-Yin's steel colossi marched into view, holding a length of aluminum alloy tubing over its left shoulder and being followed by a brown, Indian-looking gift of about seven and a fair-haired boy of around the same age. would then, of course, be mad-dog furious for having been subjected to university-trained doctors and, of kindness, the kitchen staff might warm at once to him and point him toward his quarry.
